A UNIQUE LAND

We have been listening  
for the rhythm of the  
nature, because its  
*equilibrium* is life.

BETWEEN SEA AND SKY

BEING ABLE TO WAIT

*Nature* has  
its natural flow

We made a choice: do not irrigate the vineyard. It's all up to the rain: with its cyclic nature, it feeds the soil. Working through the rows is done only with the hoe, avoiding pesticides, according to biodynamic principles. Infact, in our soil, can grow the rocket, that is a natural antiseptic protecting the plants. Everything is spontaneous, made without forcing the slow rhythm of the vine, that blesses us giving back pure grapes full of taste.

We really have learnt  
to listen our earth's times.

~ balance

“  
**My grandfather  
told me about a  
small vineyard  
by the sea...**

”

*Giuseppe Morano*

I remember of the two of us walking through this sandy field, where the breeze coming from the sea, went brushing the salt mountains. That was an extraordinary moment into an extraordinary landscape. Here, in the same white and clayish soil, with its wild but sweet heart, we had an idea: plant and grow a vineyard, being sure that the earth would reward us for our efforts.

“  
I used to believe  
and I still  
believe in this  
land and I have  
been cultivating  
my passion for  
autochthonous  
grape variety  
”

**Our roots, our story,  
will come from our future**

Being aware of this soil features and of the most ancient wine traditions, make us thinking about the grape differently. So, four different kind of soils give value to the authchtonous grape wine, to produce excellent biological wines.
